## **Starting** (3 Hours)

**Hosted by Raymond Pierre**

There's a lot more to it than just pulling a trigger! Whether you're a novice or experienced starter, you won't want to miss this clinic! We cover all starting aspects: equipment, safety, attire, positions, commands, false starts, hold times, and much, much more.

Part 1 is an indoor presentation. Part 2 is outdoors (or on the indoor track depending on weather) where we start actual athletes. No earplugs necessary. Just come ready to be enlightened and entertained!

## **Electronic Measurement**

**(3 Hours) Hosted by Chris Marcellus**

This class will introduce you to the Leica Disto E7500i for use in measuring the Throws & Horizontal Jumps.

The first half of the class will be in a classroom setting, the second half will be practical hands-on demonstration in the Throws & Horizontal Jumps.

**Both clinics start at 11AM. Please sign up at the link above. Brought to you by USATF, The Southwestern (SWTFOA), and Central Texas (CTTO) Officials Associations. Both clinics are free of charge. These are training clinics, not certification clinics. You will be notified of upcoming certification opportunities later. Questions or issues signing up? Contact: [martha\\_moore@baylor.edu](mailto:martha_moore@baylor.edu)**
